

FROM SAD TO GLAD MENTAL HEALTH PROGRAM

The RTFM Ministry Mental Health and Wellness Program is uniquely designed to meet each individual's mental health needs. The SAD to GLAD program has a unique approach to mental health that includes a faith-based approach to addictions, anxiety, depression, autism, behavioral problems, memory problems and dementia, obsessive compulsive disorders, PTSD, sleep problems, marital conflict, weight loss and nutrition. Our program offers you an approach that will identify your unique need and help you discover proven ways to live life to the fullest. A specific treatment plan will be designed to address the root causes, symptoms, coping mechanisms, and how to achieve a successful recovery. One of the main treatment modalities used in this program is cognitive behavioral therapy, also known as CBT. In this treatment modality we focus on how your thoughts and behaviors contribute to your mental instability. You will learn ways to react to your emotions, challenges, and personal issues that impact the overall quality of your life. You will also set goals with the help of your counselor and/or Brain Health Coach, in order to achieve the change, you desire. We also use interpersonal therapy, which focuses on practical issues and how your relationships with others play a role in your illness. You will learn how to spot unhealthy behaviors patterns and change them. These treatment modalities are encased in Biblical principles for those who desire to enhance their therapeutic experience. The RTFM Program is designed to equip you with long-term solutions. It is also intended to promote and improve your mental wellbeing and functioning
